7. University of Rome / Sapienza, ITALY

"Healthcare Improvement Science (HIS) is the generation of knowledge to cultivate change and deliver person-centred care that is safe, effective, efficient, equitable and timely. It improves patient outcomes, health system performance and population health."

The Bled Definition, 2014

The aim of ISTEW European Project was to develop shared academic and practice based programs that enable European Universities to build improvement capability and capacity within their own healthcare workforce. This will be accomplished through engagement with students, to support the delivery of quality healthcare

Healthcare Improvement Science

Implement of common theoretical and practical trainings for European University **to develop within their own students** abilities and knowledge needed to perform within HIS – as there are many domains to be covered

Academics providing medical training

- Increased Patient Safety
- Better and Safer Healthcare Systems
- Reduced Medical Errors
